- Figures above denote the Margin of Error based on the sample size i.e. the smaller the sample size the greater the margin of error.
For example: with a 60% result or score to a particular question, the Margin of Error (at 95% Confidence Level) for **n=100** sample size is **+/- 9.8**. This compares with a **+/- 4.4** margin error (at 95% Confidence Level) for **n=500**.
